# Trading and Profit Allocation

**E**stral to Cash Grow's financial strategy is its engagement in various trading activities, including stocks, forex, commodities, Gaming and cryptocurrencies. The company's trading experts leverage advanced analytics, market research, and risk assessment tools to make informed trading decisions, aiming to secure the best possible returns. The profits from these trading activities are then allocated to investors based on their contribution and investment plan, ensuring a transparent and fair distribution of gains.

# Introduction to Gaming Industry

The global gaming market size was valued at USD 249.55 billion in 2022 and is anticipated to grow from USD 281.77 billion in 2023 to USD 665.77 billion by 2030, exhibiting a CAGR of 13.1% during the forecast period (2023-2030). Large people worldwide are inclined toward gaming as one of their major sources of entertainment.

# NFT GAMING

Another popular sector to emerge among all these is the NFT gaming sector is play- to-earn. In NFT gaming, utility, armory, land, or any other asset can become an NFT. Becoming an NFT makes it convenient to own, transfer, and, most of all, sell on the blockchain. These gaming providers also equip gamers with marketplaces, where they can buy and sell their unique NFTs.

# CRYPTO GAMING

While virtual video game money is not a new concept, the advent of blockchain technology has created opportunities for crypto gaming. Crypto gamers can earn non-fungible tokens (NFTs) or cryptocurrency by playing and winning a game, and those digital assets then become the property of the gamer.

# Gaming Industry Worth VS Film Industry Worth

As per the report by SuperData Research, the Gaming Industry was valued at \$159.3 billion in 2020,

however, on the other side, the Movie Industry was worth \$19.1 billion, which makes the Gaming Industry around eight times bigger than the Movie Industry.

# What Is AI?

**Artificial Intelligence (AI) is the simulation of human intelligence in machines, enabling them to perform tasks like visual perception, speech recognition, and decision-making.**

## **Machine Learning:**

AI uses algorithms to analyze data, identify patterns, and make decisions, improving over time with more data.

## **Natural Language Processing (NLP):**

AI interprets and responds to human language, used in chatbots, virtual assistants, and translation services.

## **Computer Vision:**

AI processes visual data to make decisions, crucial for autonomous vehicles, facial recognition, and medical imaging.

# Investment Plans

Cash Grow's investment plans are designed to accommodate various risk tolerances and investment horizons, ranging from conservative, fixed-income securities to aggressive, equity-driven portfolios. The company employs a meticulous approach to portfolio management, emphasizing diversification, risk management, and market analysis to optimize investment outcomes.
